DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 02/14/07 has been entered.

Allowable Subject Matter

Claims 1-9 are allowed.

In regards to claim 1, none of the references of record alone or combination disclose or suggest an information recording apparatus which irradiated a laser light on a recording medium and forms recording marks corresponding to recording data, comprising: a light source which emits the laser light; a recording waveform generating unit which generates a recording pulse waveform varying between a bias power level and a write power level based on the recording data; and a recording unit which drives the light source based on the recording pulse waveform to form the recording marks on the recording medium, **wherein the recording waveform generating unit adjusts an edge position of a pulse portion having the write power level in the recording pulse waveform in accordance with the bias power level, such that as the bias power level increases or decreases from a predetermined value, the edge position of the write power level has a corresponding left or right movement.**

Art Unit: 2627

Claims 2-9 have similar claimed languages, therefore, are allow for the same reason.

Cited References

The prior art mad of record and not relied upon is considered pertinent to applicant's disclosure.

Kashihara discloses a phase adjustment according to the reproducing signal.

Harvey et al discloses a shift changes according to the rotation movement of the optical disk.

Eguchi et al discloses increase in width of the pulse by the detection of the reflected light.

Miyaoka discloses setting a sufficient phase margin due to temperature fluctuation.

Nakajo discloses an adjustment data selected in accordance with identification information preset in accordance with disk type.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Linh T. Nguyen whose telephone number is 571-272-5513. The examiner can normally be reached on 8:30am-5:00pm.

Art Unit: 2627

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wayne Young can be reached on 571-272-4483. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>.
